Per Capita Personal Income by County and MSA

In Tennessee, the per capita personal income in 2008 was \$34,833, up 1.98 percent from the previous year.

The Tennessee metropolitan counties had a per capita income of \$37,426 in 2008. During the same period, the nonmetropolitan counties had a per capita personal income of \$27,687.

Per capita personal income is the annual total personal income of residents divided by the residential population as of July 1. Personal income is derived by summing the net earnings by place of residence, person's rental income, personal dividend/interest income, and transfer payments. Personal income excludes income tax deductions and other personal taxes and is reported in current dollars. In simpler terms, it is the total income on the front page of your 1040 tax form. This data can be influenced by large growth (or decline) in population, natural disasters (i.e., flooding or hurricanes), commuting populations (those that primarily work in other

counties), and state and local taxes.

County Data

In 2008, the Tennessee counties with the highest per capita personal income were Williamson (\$55,717), Davidson (\$44,228), Shelby (\$41,598), Hamilton (\$38,460), Montgomery (\$38,270), Wilson (\$37,040), Knox (\$36,342), Fayette (\$36,287), and Loudon (\$35,546).
